

Samples of Plastic types what we handle

ABS	(acrylonitrile butadiene styrene) parts, regrinds
BOPP	(biaxially oriented polypropylene) film printed and unprinted on rolls or bales
EPM	(ethylene propylene copolymer)
ETFE	(ethylene tetrafluoroethylene), shavings, parts, regrind
EVA	(ethylene-vinyl acetate copolymer) from post industries solar film and medical bags
EVOH	(ethylene vinyl alcohol) in film in bales or on rolls
GPPS	(general purpose polystyrene) in briquettes
HDPE	(high density polyethylene) in bales or regrind from cans, pipes, jugs, barrels, crates, sheets
HIPS	(high impact polystyrene) in bales or regrind from Flowerpots, sheets, trays, spools, parts
LDPE	(low density polyethylene) in bales all qualities like 50/50, 60/40, 80/20, 90/10, 95/5, 98/2
LLDPE	(linear low density polyethylene) in bales from agriculture film all qualities and colors
OPP	(oriented polypropylene) film on rolls or in bales, printed and unprinted
OPS	(oriented polystyrene) film on rolls
PA	(polyamide or nylon), sheets, fiber, regrind, ropes
PB	(poly butadiene) regrind from pipes pre consumer
PBT	(polybutylene terephthalate) parts, lumps, runners, regrind also VO
PC	(polycarbonate), sheets, runners
PE	(polyethylene) all kind
PEEK	(polyetheretherketone), regrind, parts
PET	(polyethylene terephthalate) rolls printed and unprinted, lumps
PETG	(polyethylene terephthalate modified with CHDM) trays in bales, colored and nature
PEX	(cross linked polyethylene) regrinds light color, dark color, pipes in bales, also with alu
PMMA	(polymethylmethacrylate) sheets, parts, regrind
POM	(polyoxymethylene or acetal) parts, sheets and regrind
PP	(polypropylene) in sheets, film, parts, regrinds, barrels in bales and so on
PS	(polystyrene) all kind
PU	(polyurethane)
PVB	(vinyl butaryl) rolls or cuttings
PVC	(polyvinyl chlorid) all kind
PVDC	(polyvinylidene chloride) film, trays
SAN	(polystyrene acrylonitrile) sheet, parts, cuttings
TPE	(thermopolyethylene elastomere) from car parts
TPO	(thermoplastic polyolefin elastomere) from car parts
TPU	(thermoplastic polyurethane elastomere) from car parts
UMHW PE	(ultra high molecular weight polyethylene) from sheets, shavings
